Proficient in utilizing a wide variety of programs and tools to provide high quality and cost-effective applications/systems to boost organizational efficiency and productivity.

Experience

Paycor / Senior Software Developer

OCTOBER 2022 -PRESENT, SERBIA, BELGRADE

ReactJS - Frontend

Redux for ReactJS, States, yup validation

Azure Functions and AzureStorage

AzureServiceBus

Stackify, AzureInsights

Responsibilities: Working as part of the team, and completing everyday tasks regarding software related to a HR Sector

Achievements:

Successfully deployed first epic. Improved functionality of the app.

Google and Outlook calendar synchronization for our clients

Sandbox Environment setup

Resolving work orders (bugs) from other teams, delegating responsibilities

Finiti Solutions / Senior Software Developer

NOVEMBER 2019 -OCTOBER 2022, SERBIA, BELGRADE

United Nations Women - Web App with Clean Architecture (CQRS & Onion)

Responsibilities: Team of myself and one more colleague. Responsible for the whole process from creating the app from scratch to deployment and post-prod testing.

Achievements: helped to spread awareness of women's rights (eDiary for women that participate in UN project)

SEF Implementation - E-Invoice for private equity

RabbitMQ - Creating .net core logic event listeners, publishers, Ack/Nack messaging, setup RabbitMQ

Responsibilities: Team Lead on the project. I was responsible for setting up the project from scratch, and implementing RabbitMQ as a message broker service.

Achievements: Mass production of electronic invoicing system, based on RabbitMQ and .net core app.

E-government projects (.NET Core):

E-government Core - Implementation of fresh API logic and certificates – G2C, G2B

Responsibilities: Part of the team that implemented various services for citizens of Serbia (Police Dpt, Government documentations, Apply for kindergarten, elementary school for children, etc.)

Achievements: Improved quality of daily life for our citizens. No more waiting in long queues for administrative work to complete.

E-government Covid Passport – architectural planning and implementation of API services, workers, validation logic for positive/negative results.

Responsibilities: Shared role for TeamLead on this project

Achievements: With other 3rd party vendors, we enabled for our citizens to be first in Europe to have digital certificate for Covid19 on mobile phones

E-Scheduling for diplomatic-consular services for citizens of Republic of Serbia <https://ezakazivanje.ekonzulat.gov.rs/> - Implementing logic for scheduling appointments for various e-services for citizens who lives abroad (knockoutJS, ASP.NET MVC)

Responsibilities: One person project (no team)

Achievements: Successfully deployed to production an app written in knockoutJS MVC, and with minimal number of bugs.

Serilog, ElasticSearch Kibana (ELK), Unit tests,

Powershell scripting

Xamarin.Forms (MVVM):

OperaMobile – Assets management based on location
(Google.Maps, SQLite, Xamarin.Essentials, GPS Tracking)

Responsibilities: To ensure to implement GoogleMaps with custom pins and custom messages for each pins in real-time

Achievements: Providing an app to government cleaning company for parks and green areas in the city, for better organization on daily cleaning work (pinning on the map benches, street light lamps, garbage bins, etc.,)

Banca Intesa DIGI (outsourced project):

Responsibilities: Integration of several APIs to one Digital system of the bank

Achievements: Mass migration of users to digital banking processes, faster transactions and better overall UX

Implementation of RESTful API – core banking

Transition to digital banking channels

Securing payment processes (SQL triggers, stored procedures)

Microservices

SRC system integration / Software Developer
